## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, 16 and 18, drawn to reproducing commercial on a monitor when the broadcast program being reproduced is not a specified program, classified in class 725, subclass 34.
  - II. Claim 6, drawn to reproducing commercials during a non-broadcast period, classified in class 725, subclass 35.
  - III. Claims 7-14, 17 and 19, drawn to reproducing commercials when instructed by the user, classified in class 725, subclass 34.
  - IV. Claim 15, drawn to reproducing commercials within a predetermined period occurring before and after a timeslot, classified in class 725, subclass 32.
2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such as reproducing a commercial on a monitor when a web site is being retrieved is not a specified web site;

In the instant case, invention II has separate utility such as reproducing commercials during a non-broadcast period for a radio signal;

In the instant case, invention III has separate utility such as reproducing commercials when instructed by the user in a Internet session.

In the instant case, invention IV has separate utility such as reproducing commercials within a predetermined period occurring before and after a timeslot in a broadcast radio environment.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-IV, the search required for Group II is not required for Groups III and IV, and the search required for Group III is not required for Group IV, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

3. A telephone call was made to Joseph Price on 11/10/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### **Conclusion**

5. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
